Subject: Is it fair?

Judge Kollar-Kotally

My name is Asmat Khan and I live in New Jersey.
I heard about the some aspect of the Proposed settlement made by Justice Department in Microsoft case and I am not satisfied with this proposed settlement. It is not fair to give one company the rights of software monopoly. We are living in a free country and I think same rules applies to the software companies. I believe in the free market where I can choose the product I want offered by different and a competitive price. And it is fair with the software industry.

Your honor, I would want Microsoft be brought to justice upholding to democratic values. Sadly to say that monopolies are the trade mark of monarchs and communist governments.

Asmat Khan.
